Introduction

ADAM-5510KW is PC-based Soft-Logic Controllers. It features 5 standard IEC 61131-3 programming languages so PLC users can develop control strategies in their familiar programming languages. The strong MULTIPROG software and stable ProConOS make ADAM-5510KW the best choice for PC-based SoftLogic controllers in the market. ProConOS, (Programmable Controller Operating System), has over 250,000+ installations, and is a pre-emptive, multi-tasking run-time software providing deterministic operation down to one millisecond and runs applications developed with MULTIPROG, a fully-featured IEC 61131-3 development environment. With this KW Software distribution agreement, Advantech has bundled the ProConOS run-time software on ADAM-5510KW Controllers creating a SoftLogic Solution. It will greatly benefit PLC users to enjoy the PC-based advantage of ADAM-5510KW.

Different from the original ADAM-5510 hardware, the ADAM-5510KW includes more memory to raise system efficiency and users' programming flexibility. The ADAM-5510KW include a 1.5 MB flash memory and 640 KB SRAM which includes battery backup RAM up to 32 KB. In addition, 4 COM ports enrich the communication capacity of ADAM-5510KW to integrate with remote I/O or other 3rd party devices based on the Modbus/RTU protocol.
